

High School Hockey.

The local high school hockey team played two games during the past week, entertaining Oda at Didsbury on Friday evening and visiting at Innisfail on Tuesday evening.

The game with Oda was hotly contested and ended in a 3-3 tie after playing fifteen minutes' overtime. At the end of the regular period the game stood 2-2 and each team scored a goal in the overtime period. Wyman, Cunningham and Carleton were the scorers for the locals, while Jenkins was credited with an assist.

In the game against Innisfail Didsbury opened with a bang, when Jenkins scored two counters. They failed to keep up the pressure, however, and Innisfail had the best of the remaining play, scoring four goals and making the final score 4-2.

Knox United Church Notes.

The sermon topic for next Sunday is, "The Great Need of Today." Weather and roads permitting, there will also be a service at Westcott at 3 p.m.

Crossfield Rink Wins Major Prizes At Local Bonspiel

The Becker rink from Crossfield made a clean sweep of the major prizes at the bonspiel held this week. They won first prizes in both the Merchants and Rosebud events and also the grand aggregate.

Edmondson of Carstairs won second in the Merchants event and Wyman second in the Rosebud.

The Consolation got down to the semi-finals and the balance of the games will be played today.

Merchants Event

In the 32nds
Edmondson, Carstairs, beat Studer 11-9.

Johnson beat Chrystal, Carstairs, 9-6.

In the 16s
Caithness beat Lewis, Carstairs, 7-6.
Kaufman beat Wishart, Carstairs, 7-6.

McCloy beat McNaughton 13-9.
Pitt beat Lee, Carstairs, 10-5.
Becker, Crossfield, beat Wyman 6-5.

Liesemer beat Fisher 13-2.
Edmondson, Carstairs, beat Johnson 9-8.

In the 8s
Reiber beat Pitt 12-3.
Edmondson, Carstairs, beat Kaufman 8-1.

Becker, Crossfield, beat Liesemer 10-2.
McCloy beat Caithness 7-4.

Semi-finals
Becker, Crossfield, beat Reiber 14-6.

Edmondson beat McCloy 10-5.
Becker beat Edmondson 13-3.

Finals
Becker beat Edmondson 13-3.

Rosebud Event
In the 32nds
Kaufman beat Caithness 10-8.
McCloy beat Lewis, Carstairs, 8-7.

In the 16s
Reiber beat Edmondson, Carstairs, 7-3.
Wishart, Carstairs, beat Pitt 11-9.
Wyman beat Clarke 7-5.

Becker, Crossfield, beat Studer 13-8.
Chrystal, Carstairs, beat McNaughton 9-7.

Liesemer beat Lee, Carstairs, 9-5.
Johnson beat Fisher 9-7.

In the 8s
Wyman beat Wishart, Carstairs, 7-3.

Becker, Crossfield, beat Chrystal, Carstairs, 8-7.
Liesemer beat Johnson 10-5.

Reiber beat Kaufman 10-9 (extra end).

Semi-finals
Wyman beat Reiber 10-5.
Becker beat Liesemer 12-4.

Finals
Becker beat Wyman 11-8.

Consolation Event
In the 16s
Wishart beat Studer 11-10.
Fisher beat Clarke 13-3.

Johnson beat Chrystal 10-5.
McNaughton beat Lee 12-11.

In the 8s
Pitt beat Lewis 11-10.
Fisher beat Wishart 12-11.

Kaufman beat Caithness 9-5.
Johnson beat McNaughton 11-8.

Semi-finals
Johnson beat Fisher 12-9.

Celebrates 95th Birthday

Mrs. Ben Hunsperger, who resides with her daughter, Mrs. T. A. Murphy, at Westcott, celebrated her 95th birthday on Monday last. Mrs. Hunsperger being born on February 8th, 1842. We noticed that she was congratulated over the air by C.F.C.N. on Monday evening.

Mrs. Hunsperger is an old timer in this district. Born in Waterloo County, she also lived in Michigan and Kansas and came to Alberta in 1900.

I.O.D.E. Elect Officers.

The officers of Mons Chapter, I.O.D.E., were elected at the meeting held at the home of Miss Lucille Smith on Monday evening.

The following were the officers elected:

Regent, Mrs. McGhee.
1st Vice-Regent, Mrs. Ranton.
2nd Vice-Regent, Mrs. Fisher.
Secretary, Mrs. Chas. Mortimer.
Treasurer, Lucille Smith.
Echoes Sec., Mrs. Phillipson.
Standard Bearer, Dorothy Hugel.

Aberhart Hopes Session Will End In Three Weeks

Hope of completing the forthcoming session of the Alberta legislature within three weeks after the opening on February 25th, was expressed on Monday by Premier Aberhart. If this comes about, it will be one of the shortest regular sessions in many years. Time required for the session will depend to a great extent upon how soon the estimates can be prepared and the budget submitted to the House.

Evangelical Church Notes.

Next Sunday morning the subject will be, "The Christian's Final Satisfaction," and in the evening we will consider the subject of, "The Effect of Sin on Material Circumstance."

A Catechism Class has recently been formed. If there are any children who have not taken the course they could begin now.

Mayor Chambers is Re-Elected.

Fred Budgeon and J. V. Berscht Poll Heavy Votes for Town and School.

The Mayor and Town Council again received a decided vote of confidence at the election held on Monday, when the retiring mayor, H. W. Chambers, was re-elected by a sweeping majority over J. W. Phillipson.

The two retiring councillors, F. H. Budgeon and C. E. Reiber were re-elected, with W. E. Rieder the third to be elected to the council.

For the School Board, E. Buhr, only retiring trustee in the race, was re-elected, with J. V. Berscht and A. R. Kendrick the other two candidates to be elected.

Besides the large majority accorded the mayor, the other feature of the election was the large vote accorded Mr. Budgeon for councillor and Mr. J. V. Berscht for school trustee. Excepting twenty-four, Mr. Budgeon was accorded a vote on every good ballot.

For mayor and councillor 270 ballots were polled. There were six spoiled ballots for mayor and eleven spoiled ballots for councillor. For school trustee 277 ballots were issued, with eight spoiled.

The following were the results of the voting:

For Mayor	
H. W. Chambers	183
J. W. Phillipson	81
For Councillor	
F. H. Budgeon	235
C. E. Reiber	154
W. E. Rieder	151
R. E. Lantz	124

For School Trustee	
J. V. Berscht	218
E. Buhr	142
A. R. Kendrick	139
D. M. Sinclair	137
W. W. Gillrie	126

Items of Interest

Warning has been issued recently by H. F. Gordon, in charge of administering the Farmers' Creditors Arrangement Act, against men seeking fees from farmers to assist them in applying for financial relief under the act. Mr. Gordon said that complaints had been received, particularly from Alberta, that unauthorized canvassers were going among the farmers, urging them to make application for a scaling down of their debts under the act and attempting to obtain money for these services.

Government choice for the post of Speaker of the Legislative Assembly, Rev. Peter Dawson, member for Little Bow, arrived in Edmonton the first of last week to make the preparations to take over the office. His appointment as Speaker will not become official until the assembly meets, when the necessary motion will be submitted. He is to succeed Hon. N. E. Tanner, who resigned to become minister of lands and mines, succeeding C. C. Ross.

Something New In Agriculture

The vista of a new basis for marketing cereal grains, fruits, vegetables, meats and other farm products opens up for the farmer, sometime in the future, with the comparatively recent discovery that mineral salts are essential to human health, that the only way that these necessities can be properly assimilated is through food containing them and that many foods do not contain enough because the soil has been robbed of a substantial proportion of these elements.

The theory, if it can still be referred to only as a theory, is that vitamins, which are now known to be essential to life and health, regulate the absorption of minerals in the system and that even though vitamins are contained in food they cannot be assimilated without accompanying mineral salts. Further it is contended that many soils have been depleted of one or more of the essential minerals and that, therefore, food grown in such impoverished soils, lacks the required nutritional value and before they can again be made valuable for human consumption, lost minerals must be restored to the soil.

The discovery and the results of subsequent experiments which have been intensively conducted in several districts in the United States point to the possibility that sometime in the future the discriminating consumer will want to buy his carrots, his eggs, his bread and his breakfast cereal on the basis of their mineral content, rather than by the bushel, the dozen, the pound or the package.

When and if this time ever comes, the farmer who is able to guarantee the mineral content of his products should be able to secure a premium over the price paid to his colleague for just carrots, wheat, eggs and bacon. But, to be able to do this, he will first have to ascertain the mineral content of the soil from which these products are derived and to restore any deficiencies there may be of any one or more of at least 16 mineral elements regarded as essential to normal nutrition.

Thus the farmer of the future will have to add to his many other qualifications something of a knowledge of physics and chemistry.

Much has been written and said about the dietetic values of different foods during the past 15 or 20 years and during that period many new discoveries have been made in this field as research work became more intensive and as each new discovery led to the threshold of another.

Before scientists entered the field of dietetics man had to learn by trial and error what foods best suited his digestive tract, and what comestibles build up health and strength. Then the calorie was discovered as the unit of measure of the value of food in terms of energy.

Still later scientists discovered that the human body could consume the standard requirements in calories and yet starve if the food did not contain another essential factor, the vitamins, and now we are told the vitamins can only do their work if mineral salts are present in co-ordination.

This discovery is attributed to Dr. Charles Northern, an Alabama physician, by Rex Beach writing in Hearst's International Cosmopolitan, and he reports some remarkable results of experiments conducted by Dr. Northern and his disciples. He reported that a "gentleman farmer" at Niagara Falls succeeded in adding iodine and iron to soil so liberally "that one glass of milk from one of his cows contains all the minerals that an adult requires for a day."

Dr. Northern and Mr. Beach himself found by actual experimentation that plants grown in properly balanced soil withstood insect pests and disease while adjoining plants in untreated soil were riddled by the one and ravaged by the other. "My celery," said Mr. Beach, "had more than twice the mineral content of the best grown elsewhere; and it kept much better, proving that the cell structure was sounder."

The writer quotes Dr. Northern as giving the comforting assurance that the process of restoring soils to proper mineral balance is neither complicated nor expensive. "Any competent soil chemist," says Dr. Northern "can tell you how to proceed. First determine by analysis the precise chemistry of any given soil, then correct the deficiencies by putting down the missing elements. The same care should be used as in prescribing for a sick patient, for proportions are of vital importance."

Mr. Beach also quoted a nutrition authority as stating that "Happily, we're on our way to better health by returning to the soil the things we have stolen from it. The public can hasten the change by demanding quality in its food, insisting that health departments establish scientific standards of nutritional value. The growers will quickly respond. They can put back those minerals almost overnight."

Printed sermons, taken from the print shop of Benjamin Franklin, were converted into musket cartridges for the battle of Monmouth during the Revolutionary War.

Teacher: "Junior, tell me the definition of the word 'widow'."
Junior: "A widow is a woman that lived so long with her husband that he died."

Canadian Authors

Dominate Home Market And Sell Stories To American Magazine

Canadian authors in the short story field have more than made the best of their unlimited opportunities at home—they have entered the United States market and held their own against heavy odds, according to the editors of three of Canada's largest fiction-using magazines.

High standards set by American magazines necessarily have meant the same requirements for Canadian fiction writers because of active competition without the benefit of a protective tariff, the editors agreed. Although matched against American "name" writers and without the build-up publicity available to their competitors, Canadians, besides dominating their home market, are selling stories to United States magazines.

Joseph L. Rutledge, editor of Canadian Magazine, believes Canadians are writing just as good stories as Americans and, what counts more, selling them. William Dawson, managing editor of the Canadian Home Journal, said of the 65 short stories he published this year, 40 were written by Canadians.

Unknown writers have more than a good chance of selling their products in Canada—as long as the story meets all requirements, said H. Napier Moore. The editor of Maclean's Magazine said if a good story was submitted, no matter who the author might be, back would go a cheque by return mail along with a request for more.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sick and the world looks pink.

A new bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of catnip but have no catnip or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

Experiment With Telepathy

University Professor Tried It With Deck Of Special Cards

Experiments which he says mathematically prove the existence of telepathy have been made public by Prof. J. B. Rhine, of Duke University in Durham, North Carolina.

The telepathy was based on a special deck of 25 cards, whose faces bore one of five designs, a star, plus sign, wave, rectangle or circle. There were five of each in the pack.

Miss Sara Ownbey, Duke psychologist, imaged these cards, one after another, as they might lie in the pack. "GZ" another Duke psychologist, a man, sat with eyes closed and told card by card what Miss Ownbey was thinking. He did not always read her mind.

But when he sat beside her and called the whole pack 950 times, his average of right calls of her imaginary cards was 14 per pack. When he sat in the next room from her, his average was 11.6 in 750 packs and when he sat two rooms away his average was 16 cards right in each of 250 packs.

He made, furthermore, one perfect score of 25 while sitting beside Miss Ownbey. He made numerous runs close to 20 or even above.

Mechanization Of Cavalry

Means That Horses Will Not Go To Future Wars

The horse will never again go to war, according to the director of military training of the Canadian Department of National Defence.

That's something to be thankful for.

If men will go on killing each other, that's their business, but horses don't want to kill each other, or anybody else, and, we fancy, they don't like to be mangled and left to die on battlefields to settle man's disputes.

"The Charge of the Light Brigade" gave Tennyson the subject for a very fine poem, but paintings of it give anyone who loves man's noble animal friend a pain in the stomach.

The mechanization of cavalry, while it may speed up the slaughter of mankind, which is responsible for war, will at least spare from war's horrors a lot of very fine animals, who are in no wise responsible for wholesale throat-cutting. — Detroit Free Press.

Empire Service League

King George Has Consented To Be Patron-In-Chief Of Order

King George has consented to succeed the former King Edward VIII, as patron-in-chief of the British Empire Service League, J. R. Bowler, general secretary of the Canadian legion, announced at Ottawa. The legion is the Canadian member of the league, founded by the late Earl Haig. His Majesty thus follows the example set him by the late King George V., who became patron-in-chief at the inception of the organization.

SELECTED RECIPES

PLAIN REFRIGERATOR ROLLS

Temperature: 425-400 degrees F.
Time: 12 to 15 minutes.

2 cups milk; 1/2 cup sugar; 2 teaspoons salt; 3 tablespoons shortening; 1/4 cup lukewarm water; 1 tablespoon sugar; 2 eggs, well beaten; 8 cups Royal Household flour; 2 cakes fresh yeast.

Method: Scald milk; add 1/2 cup sugar, salt and shortening; cool to lukewarm. Dissolve the yeast in the lukewarm water; add 1 tablespoon sugar; let stand 5 minutes. Add to milk mixture. Now add well beaten eggs. Stir in 4 cups Royal Household flour; beat until smooth. Continue adding flour just as long as the batter can be stirred (approximately 4 cups). Brush lightly with melted butter; cover; place in refrigerator. When about to make the rolls, take out as much batter as desired. Roll on lightly floured board; cut with floured cookie cutter. These rolls may be shaped in finger rolls, Parker House rolls or crescents. Place on greased cookie sheets, two inches apart, let rise until double in bulk (about 2 hours). Bake in hot oven 425 degrees F. for 5 minutes; reduce heat to 400 degrees F. and continue baking until brown. Remove from oven and brush with melted butter.

TUNA NEWBURGH

10 Christie's Soda Wafers, rolled fine
1 1/2 cup rich milk
1 tablespoon butter
2 tablespoons shredded green pepper.
1 tablespoon minced onion
2 tablespoons pimiento strips
2 cups tuna
1 egg
Salt and pepper
Soak crackers in milk, add butter and slowly bring to boiling point. Add peppers, onion, pimiento and tuna. Stir into beaten egg and return to fire and cook three minutes, stirring constantly. Serve on heated soda wafers. Six portions.

To Ease a Headache Fast

Get Real Quick-Acting,
Quick-Dissolving
"ASPIRIN"

See How
"ASPIRIN"
Tablets Work

In 2 seconds by stop watch, an "Aspirin" tablet starts to disintegrate and go to work. Drop an "Aspirin" tablet into a glass of water. By the time it hits the bottom of the glass it is disintegrating. What happens in this glass . . . happens in your stomach.

For QUICK Relief

If you suffer from headaches what you want is quick relief.

"Aspirin" tablets give quick relief, for one reason, because they dissolve or disintegrate almost instantly they touch moisture. (Note illustration above.)

Hence—when you take an "Aspirin" tablet it starts to dissolve almost as quickly as you swallow it. And thus is ready to start working almost instantly . . . headaches, neuralgia and neuritis pains start easing almost at once.

"Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Try it. You'll say it's marvelous.

Awaits Super Metal

But Bridge Building Was Greatly Helped By Bessemer Process

Every 24 hours, about 3,000,000 people cross the bridges of New York City alone. With six mammoth bridges lying within 10 miles of each other, the bridge facilities across the East river, New York, are still considered insufficient.

The opening of a new bridge causes an important change in the life of a city and the population spreads rapidly into the suburbs.

For thousands of years, man found his best bridge material in stone, but the work of keeping the ancient bridges in repair was quite costly. The same was the case with wooden bridges. Storms, winds, sunshine and flood destroyed their foundations and made them unsafe. In the middle of the nineteenth century the first metal bridges, made of cast iron, appeared. But they were impractical because cast iron lacks tensile strength. The development that revolutionized bridge building was the Bessemer process. This enabled engineers to design steel trusses with high tensile strength.

John Roebling originated the use of wire cables for suspension bridges in America. His great undertaking, the Brooklyn Bridge, was literally spun out of thin steel threads.

Bridge building, like shipbuilding, awaits a super metal. With present materials, it would be possible to build a suspension span 10,000 feet long, or a little less than two miles. — Popular Mechanics.

Warehouses at Calgary, Edmonton, Regina and Winnipeg

With Improved Business Conditions The Number On Relief Will Show Increase

Despite undoubted advances in employment and trade, the number of persons on relief in Canada is larger at the end of 1936 than at the end of 1935, the Canadian Welfare Council stated in its annual survey of relief trends.

The council came to the "reluctant conclusion" that unemployment relief totals at the year's end will show an increase of six to eight per cent. for Canada as a whole over last year's totals at this time. Further increase may be expected, it said, as dependency grows in the western drought areas.

The figure might run even to 12 per cent. above last year's total if all those added now through special works projects, farm placement and other schemes were included, it added.

The council's estimates are based on information gained by members of its staff in actual visits to every province since Oct. 1.

"With the business index in Canada showing an improvement of more than 50 per cent. since 1933, and with employment up about 30 per cent., there can be only grave realization that we are not breaking the line of national relief totals when these show only about 18 to 20 per cent. reduction from those at the corresponding period in the depth of the depression," the statement continued.

The large number of workers who have managed to maintain themselves and keep off relief with part-time or temporary employment, and who have been the first to benefit from new employment opportunities, the technological improvements in industry since the beginning of the depression and the drought conditions in the west which have retarded improvements in industry and commerce were advanced as reasons contributing to the continuing high totals in relief.

"All of these considerations affect the situation," the council observes. "But in its residuum it comes down to two or three stern realities, of which one is that the depression has left Canada with a burden of economic dependency just as surely as the war left her with a \$42,000,000 annual war-pension burden.

"Somewhere, we do not know where, there is a high water line of broken men and women, most of them in upper-age groups, who with their dependents will form the solid core of our needy for much time to come. About 50 per cent. of those on relief have been on now fairly steadily for nearly three years."

Many socially dependent and unemployable persons have remained under direct unemployment relief because of the lack of adequate provincial and municipal welfare service to meet their needs, the council declared.

In British Columbia, where a special study of this phase of the relief problem was initiated recently, an analysis by welfare authorities showed that 11 per cent. of family heads and individual workers on direct relief were totally unemployable, 15 per cent. partially disabled, nearly 17 per cent. over 60, and nearly 10 per cent. farmers. The problem of full re-employment was judged as affecting therefore only 48 per cent. of the total on relief.

Referring to "a growing impatience" with the continuing high relief totals in the face of economic gains, and a general impression that many of the unemployed will not seek or take work, the statement conceded this may be true of some proportion of these "whom careless, mass handling of the problem has encouraged in dependency," but it is not true of the greater number of formerly self-supporting workers "who ask only the opportunity of employment to demonstrate their willingness to take it."

"Adequate and energetic organization of the public employment service and effective reorganization of the relief services are needed if justice is to be done alike to the taxpayer and to the bona fide unemployed, genuinely in search of work," the statement added.

The position of the unskilled or

semi-skilled worker, under prevailing wage rates and conditions of employment was cited as a factor keeping relief totals high.

These workers, who make up from 40 to 60 per cent. of those on relief, could do better on relief if they had large families to support than they could on their average earnings when employed at prevailing wage rates in unskilled or semi-skilled pursuits.

A total of from 1,050,000 to 1,100,000 on direct unemployment relief, with a probable 200,000 or more included from the drought areas, and perhaps another 100,000 aided through works projects, farm placement and settlement. A grand total of approximately 1,200,000 is the council's estimate of Canadian relief totals for mid-December.

Reduced totals in certain parts of Canada, notably in a number of Ontario cities, slight reductions in Nova Scotia as a whole, and larger reductions in British Columbia, were recorded on the welfare council statement.

Got Credit Anyway

Country Squire Thanked For Turkey He Forgot To Send

Sir Sam Fay used to tell a story of a country squire who usually sent a poor neighbor a turkey at Christmas time. One Christmas he forgot, and, meeting the man soon after, he said, jokingly: "Well, how did you like that turkey I sent you this Christmas?" "Oh, very much indeed, sir, thank you!" replied the man heartily. "It was a splendid bird!" The squire gasped. "Wh-what's that?" "I say it was a fine bird, sir," the poor neighbor went on, "though I very nearly didn't get it at all." "How was that?" was the squire's natural question. "Well, sir," the man proceeded, "knowin' you'd send me a turkey, as usual, sir, I was expectin' it, so to speak, but it didn't come. So I went up to the post office and I made a fuss about it. I told them who it was coming from, and I said you'd be very angry if I didn't get it, so they took me into a room where there was a lot of parcels of turkeys that had lost their labels in the Christmas rush and said could I identify the parcel. I looked through the parcels, and, knowing your kindness, sir, I chose the biggest and said that was it. And, as I said, sir, a very fine bird it was too!"

New Wood Preservative

Life Of Wood Said To Be Lengthened By New Process

A new wood preservation treatment, lengthening the life line of telephone and telegraph poles, bridge piling and underground beams used in mines, was being used in the battle against moisture, fungi and insects.

Although winds have been said to be the cause of bowled-over poles or earth settling the cause of a mine disaster, T. A. Sparks, Winnipeg lumberman, revealed the main trouble generally was decay of wood fibres.

By the use of the "osmose process", he said, freshly cut trees can be permeated with a fluid that is toxic against insects, moisture and fungi growths. Thus timbers subject to atmospheric changes are given life 15 to 20 times their normal span.

Sodium fluoride, a salt solution, and dinitrophenol, a moisture protective, mixed into a pasty fluid, is painted on a tree after its bark has been removed while still green. The liquid then will permeate the timber in a period of 25 to 90 days by the osmose law, an old physical law whereby liquid diffusion takes place through a porous wall or membrane.

Receives Ancient Sword

The provincial archives at Victoria have been presented with the sword of Capt. H. R. Luird, who, in 1859, went to British Columbia with the Royal Engineers and was prominent in the early development of the province. Miss E. N. Luird, now living in England, sent her father's sword out with Sir Percy Vincent, lord mayor of London, when he visited the coast in August. 2185

Brighter Farm Prospects

Farmers East And West Look Hopefully To The Future

With the turn of the year, Canadian farmers look forward to what 1937 holds in store for them. In Western Canada after the long series of dry weather and consequent short crops, farmers may well look ahead with hopes for improvement. In Ontario, too, the drought of 1936 in many of the agricultural areas of the province fathers the hope of more bountiful harvests for 1937. While it is true that weather has a greater influence on the agricultural production of any given year, there are also other factors which should be given consideration. Prices of agricultural products vary from day to day and from year to year. In view of these variations in price, it is often possible for individuals to make adjustments in their production program in such a way as to take the fullest advantage of price movements. The trend of such price movements depends on a wide variety of forces which affect the supply of and the demand for individual commodities.

In the broad sense, the whole agricultural market position is affected by conditions in the world markets and in the markets at home. World trade improved somewhat during the first nine months of 1936. However, many of the trade barriers erected in recent years are still impeding the movement of goods between the nations of the world. It is encouraging to Canadians to note that the trade of the two chief customer countries, the United Kingdom and the United States, has been showing improvement. Domestic recovery is well advanced in these two nations. In Canada economic conditions showed material recovery in 1936, and this has brought about a strengthening of the demand in Canada for agricultural products. Prospects for further improvement in 1937 appear reasonably bright.

The question of the prospects for Canadian agriculture in 1937 is discussed in detail in "The Agricultural Situation and Outlook for 1937." This publication will be available free from the Publicity and Extension Branch of the Department of Agriculture.

Only Seven Left

Religious Sect Known As Shakers Once Numbered 5,000

The discovery has been made that there are still seven members of the Shakers living at Waterville, near Albany, N.Y., the last remnant of a community which formerly numbered nearly 5,000.

The Shakers are an American religious sect, but they had their origin in England about 1760. The founder was Ann Lee, daughter of a blacksmith, born in Manchester just 200 years ago.

Diner—"Waiter, look at the ends of this sausage."

Waiter—"What's wrong with them, sir?"

Diner—"They're very close together, aren't they?"

Radical Changes In Heating Principles Of Refrigerator Cars Will Widen Markets

Farmers' Account Book

Record Of All Farm Transactions Should Be Kept In Business Like Manner

The Canadian farmer may be absolved from the accusation that in taking stock of his farm business at the present time he is only following the often futile fashion of making good resolutions for the New Year. It just so happens that the season of the year when good resolutions are popularly supposed to have a special virtue coincides with that period of the year which affords the farmer the best opportunity for making a detailed survey of his business, past and future.

To-day, farming is more of a business proposition than ever before, and the farmer who does not know the exact state of how he stands with reference to every item connected with the farm is at a disadvantage with the farmer who does. Somewhat more than a rough and ready method is necessary.

A record of each department of the farm business should be kept because it is the only way of finding out which part of the farming pays and which does not. To assist the farmer in this very important matter, the Dominion Department of Agriculture issues a very simple and useful little account book which may be obtained from the King's Printer at a nominal price of 10 cents. No special knowledge of accounting is necessary and a record of transactions can often be made in less than one hour per week.

Had One Good Feature

Lincoln's Election To Presidency Got Them Some New Clothes

When it became an assured fact that Abraham Lincoln was to be President of the United States, the president-elect with his wife got ready to start on the journey to Washington.

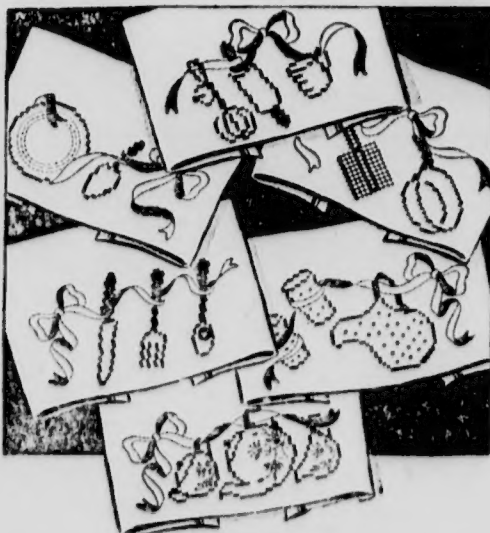

They paid a brief visit to Chicago where Mrs. Lincoln purchased her inauguration gown, the first silk dress she had ever owned.

As the two were unpacking their purchases after their return home, Lincoln remarked, "Well, wife, there is one thing likely to come out of this scrap anyhow. We are going to have some new clothes." — Christian Science Monitor.

Takes Engineering Honors

A girl is taking honors in what is generally considered a "man's profession" at the University of Wisconsin, according to a bulletin from the university. She is Miss Mary Anderson, a student in the chemical engineering class who is the sole representative of her sex on an honor roll which bears the names of 51 men.

An Exclusive Alice Brooks Design

Household Arts by Alice Brooks

Cross Stitch Puts Gaiety into Tea Towels

PATTERN 5685

Looks for all the world like a Kitchen-waiter Festival, doesn't it—this bright collection of utensils dancing their merriest jigs on your kitchen towels. Trust Alice Brooks to bring you something new and different in the way of day-of-the-week towel sets. Here it is, and just wait till you see the effect of simple 8-to-the-inch cross stitch in black, say, with ribbon garlands in the gayest of colors! In pattern 5685 you will find a transfer pattern of six motifs averaging 9½ x 8 inches; material requirements; color suggestions; illustrations of all stitches used.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Radical change in heating principles for Canadian railway refrigerator cars may permit the Dominion to find its full share in United Kingdom markets for bacon and apples.

Ten new cars, designed through co-operation of the National Research Council, have proved successful in test shipments of bacon, apples and other perishable commodities, and probably will mean wider markets and greater prices for Canadian producers, according to J. L. Townsend, system supervisor of perishable traffic for Canadian National Railways.

Mr. Townsend, who co-operated with Dr. C. B. Niven, of Ottawa, in designing the new system which permits refrigerator cars to be kept at an even temperature throughout for the first time, said to-day all tests by the railway had been "perfect."

Canadian bacon, which at present supplies only 50 per cent. of its quota in the United Kingdom, has been shipped from Edmonton to Halifax in maximum temperatures of 46 degrees below zero for the first time without loss.

Under present heating arrangements, the Canadian producer suffers from lack of demand in the United Kingdom for bacon which also brings prices lower than Danish products. With the new system based on a charcoal heater placed on one side of the car beneath the door instead of inside the car as at present, Mr. Townsend said Canadian bacon could be shipped from the west to Halifax and Saint John ports "in perfect condition."

Canadian bacon, damaged by uneven temperatures, at present means a loss of approximately \$500 per car, Mr. Townsend estimated.

Apples and other perishable goods suffered in the same way. Fresh meats from western Canada, for instance, brought in Montreal two cents per pound less than other meat which had been only "chilled," instead of being frozen, the only way in which meat can be transported under old plans.

Mr. Townsend, after displaying written congratulations from the United States department of agriculture, which also requested complete information of the new system, quoted a letter from the head of one of Canada's largest packing houses.

The packing executive said "one of the most vital things in development of Canadian trade is getting bacon to England in perfect condition," and expressed the hope that by next winter the railways would have cars sufficient to handle "all bacon available for export."

Heat for the new cars, Mr. Townsend explained, was supplied from the "underslung" heater by circulation of an "anti-freeze" solution through piping around the base of the car which permitted maintenance of even temperatures all through the shipment. The old system provided temperatures varying 20 degrees from the bottom to the top of the cars which usually meant overheating at the top of the shipment and possible frostbite around the base.

Treat Seed At Elevators

Farmers In New York State Saved Much Time

Grain elevators and mills in New York State are making themselves popular with farmers by treating their seed against smut and other plant diseases. Done in a wholesale way the cost to the elevator is very small and the saving of time to growers is considerable. Although advocated by Cornell University pathologists for a long time, it wasn't until recently that the mills took up the practice, a company in Waverly, New York, being first. Country Home Magazine.

Learning Is Personal

No man ever yet learned by having somebody else learn for him. A man learns arithmetic by blundering and blundering out, but at last he gets it. A man learns to write through scrawling; a man learns to swim by going into the water, and a man learns to vote by voting. Henry Ward Beecher.

J. E. Gooder - Editor & Manager

The World of Wheat.

By H. G. L. STRANGE

Director "Crop Testing Plan."

Duties set up against Canadian wheat by foreign countries are coming down! France, Germany, Italy, Holland, Belgium, Switzerland, Norway and Sweden, all recently have either actually reduced tariffs against Canadian wheat, and other export wheats, or are considering doing so.

This is most welcome news, but it is only what could be expected at this time, and which was actually forecasted several years ago by some persons.

History reveals that the economic events which happen after a great war always occur in about the same sequence. After the boom—the natural consequences of a great war—inevitably comes a depression. During the depression countries try to produce and manufacture, at home, goods and commodities which hitherto they had imported from their neighbors.

This spirit of "Nationalism" or "Self-Sufficiency" continues for a few years, then the realization sharply comes that as imports are curtailed, so exports going out of any country are correspondingly reduced. As soon as this is recognized, economic sanity returns, and countries begin to reduce their tariffs.

Next will come the tearing down of other restrictions against international trade and commerce, such as quotas, barter arrangements, depreciation of money and so forth.

Meanwhile Canada will sell her wheat more easily.

Following factors have tended to raise price: Indian crops begin to deteriorate as Monsoon fails to arrive; Belgium, Germany and Holland buy Argentine oats and barley; rye exports temporarily suspended by Poland; Germany puts margarine, butter, lard and other fats on ration basis as from January 1st; expect greater demand for Manchurian Soy beans from Germany and Japan this year.

Following factors have tended to lower price: First acreage estimate of winter wheat for 1937 harvest indicates increases over 1936; consumption that 1936 Japanese rice crop almost a record; estimated Argentine corn surplus increased 33 million; new corn prospects excellent; British hop production shows slight increase.

Social Credit Notes.

The Didsbury Pioneer S.C. Group held its regular meeting at the home of Chris Rapin on Monday evening February 8th. Due to the absence of the president, Mr. E. N. Boettger acted as chairman. An entertainment prepared by the entertainment committee was rendered, after which some reports were discussed and arrangements were made for another social entertainment to be held on February 16th in the lounge at our home. The next meeting will be held at the home of Matthew Green on Monday evening February 15th at 8 o'clock. All are welcome.

H. Erb, Secretary.

Curling Notes.

Arrangements are being made to hold a Mixed Bonspiel, and all ladies wishing to enter are asked to give their names to Tom Johnson or Bill Gillrie.

Didsbury Lady Curlers went to Carstairs Saturday afternoon with three rinks, but were only successful in winning one game. Mrs. Topley's being the winning rink. The Didsbury rinks were:

Mrs. Topley, skip; Mrs. Phillipson, Mrs. Durrant and Laura Buhr.

Mrs. Bert Fisher, skip; Mrs. Edwards, Mrs. W. Klein and Evelyn Liesemer.

Mrs. McCoy, skip; Mrs. Halliday, Lila and Mary Wigglesworth.

Canada 1937

The Dominion Bureau of Statistics announces the publication of the 1937 edition of the Official Handbook of Canada.

The Handbook covers the present situation in the Dominion from the Atlantic to Pacific, the weight of emphasis being placed on those aspects which are currently of most importance. All phases of the country's economic organization are dealt with, and statistics are brought up to the latest possible moment. The text is accompanied by a wealth of pertinent illustrative matter which adds to the interest of the subject treated.

The price of the publication is 25 cents per copy, which charge covers merely the cost of paper and actual presswork. A special price concession has been authorized in the case of teachers, bona fide students, and ministers of religion, since past experience has shown that considerable use has been made of this publication for educational purposes and it is the policy of the Minister to encourage such use. To such individuals, therefore, the price is set at 10 cents for one copy. Postage stamps are not acceptable, and applications must be accompanied by a postal note or by the appropriate enclosed by two squares of thin card gummed together at the edges. Applications should be addressed to the King's Printer, Government Printing Bureau, Ottawa, Canada, and since the supply is strictly limited for both the 25-cent and 10-cent classes, early application is suggested.

The Weekly Editor.

The editor stood at the party gates. His face was worn and old, he looked asked of the crowd of old. Admission to the foot.

"What have you done?" Saint Peter asked.

"Oh I ran a country printing plant. On earth for many a year."

The gate swung open sharply.

"A—Peter touched the bell."

"Come in," he said, "and take a harp."

"—You've had enough of Hell!"

Canadian Pacific Extends Air-Conditioned Service

The Canadian Pacific Railway Angus Shops at Montreal are humming with activity these days as the Company continues its comprehensive programme of air-conditioning. In the current year, air-conditioning equipment will be added to 136 cars, including standard sleepers, dining cars, tourist sleepers, parlor cars, and day coaches, and these, in addition to the 130 cars air-conditioned in 1936, will permit a very considerable extension of air-conditioned services throughout the Dominion.

Provision is made by the 1937 programme to provide air-conditioned dining cars on all trains carrying air-conditioned sleepers or parlor cars, besides additional

sleeping and parlor cars for use on trains between Montreal and Quebec, Montreal and Ottawa, Toronto and Ottawa, and trains 39 and 40 between Montreal and Saint John, N.B. Air-conditioning of tourist cars for use on the transcontinental trains between Vancouver and Montreal and Toronto is a new and interesting feature of the 1937 programme. This will supplement last year's services which allowed air-conditioned standard sleepers, compartment-lounge, bedroom and parlor cars to be used on transcontinental trains between Montreal, Toronto, and Vancouver; the Montreal, Toronto, Hamilton, Chicago services; and the night trains between Montreal and Boston. Air-

conditioned sleepers and lounge cars were also provided for the "Mountaineer" service between Chicago, St. Paul, and Vancouver. Some idea of the work connected with air-conditioning is given by the pictures above. Cars are stripped, as in lower right, and insulated to keep out heat, cold, and dust. The pictures at the left show some of the material being placed in the cars. The satisfaction written all over the face of the young lady, in "Lower 5," expresses the public's feeling toward this new type of controlled comfort. In the centre is a close-up of the control equipment, by which, as the arrows indicate, the individual can regulate the volume and direction of the flow of air.

"BUY IN DIDSBURY"

Mountain View Notes

Marjorie Mosley spent a week with Elsie Dahl on the Burns Ranch.

Mr. Garnet Tighe attended the Trustees' Convention in Edmonton last week.

We are pleased to report that Richard Oldham is able to get around again after his long illness.

Hugh Roberts left for Calgary on Tuesday to attend the Dairymen's Convention which is being held at the Palliser Hotel.

Mrs. George Clarke received the sad news from England of the death of her mother, Mrs. Smith, whom we understand was preparing to make a trip to Canada. The people of the district sympathize with Mrs. Clarke in her sad bereavement.

Mountain View S.C. Group held a meeting last week at the home of Hugh Roberts, with only a few members present. It was decided to postpone the annual meeting until March. Time and place will be announced later.

Notes From the West.

Mr. and Mrs. E. Fisher visited with Mr. and Mrs. F. Byrt last Thursday.

Mr. and Mrs. J. Luft and family were Sunday evening visitors with Mr. and Mrs. A. Hogg.

Mr. and Mrs. D. Evans, Mr. and Mrs. J. Hosegood and Mr. and Mrs. A. Hogg were dinner guests of Mr. and Mrs. Parker on Sunday.

Tuesday, February 2nd, Mrs. E. Parker entertained the ladies of the district at a social afternoon in honor of Miss Connie Hosegood. Great amusement was caused by the making of newspaper hats, a Simpson model being most effective.

Most of the young people of Elkton and Rugby districts attended the fare-well party given Wednesday evening last by Mr. and Mrs. Jas. Hosegood in honor of their daughter Connie, who has left for Toronto to complete her bachelor of science course.

Rugby Notes

The February meeting of Rugby W. I. was held at the home of Mrs. Johnston. Owing to the state of the roads and the extremely cold weather no meeting was held in January, but when the roll was called it was found that 11 members had defied the very contrary weather to attend this month's meeting.

The afternoon was spent lining up the year's program of work. The March meeting will be held at the home of Mrs. Cowitz, with "Home Economics" as the topic, under the convener'ship of Mrs. Parker. We hope the rest of the members will have dug themselves out of the snow drifts by then.

Weather permitting the W.I. will sponsor a whist drive at the home of Mr. A. Cowitz on Tuesday evening, Feb. 16th. Admission 10 cents. Everybody welcome. Members will please bring lunch.

Burnside Notes.

Mr. Alfie Thompson spent the weekend in Calgary.

Mr. George Campbell was a Sunday evening visitor with Bob Eckel.

Mr. Emil Bantz is spending a week with Mr. Chris Ehret.

Mrs. N. Eckel will entertain the Bridge Club this week.

Lone Pine Hall Board's annual meeting will be held on Monday, February 15th.

Mrs. Kate Saunders moved to Calgary on Thursday last. She will take up her residence in that city.

James McCulloch and Robert Eckel were business visitors in Calgary on Tuesday and Wednesday.

Mr. Bert Pross who has been visiting some time at Westerdale, returned home last week with his daughter Mrs. Ted Bolton, and husband, who spent the weekend here.

Doings of Our Neighbors

AT CARSTAIRS: Jack Boucock was elected by acclamation to the village council to serve a three year term. H. C. Beckner, retiring councillor, who has served for the past six years, refused to stand for nomination for a further term.

AT OLDS: There was no interest shown in civic affairs the week before last, as only representatives of the council and school board turned out to the annual ratepayers' meetings.

Dr. H. P. Kenney was elected as mayor by acclamation. Olds citizens showed their faith in the present town council by returning by acclamation all members whose term of office had expired. Those re-elected were J. H. Kemp, F. Shackleton and George Urquhart. Other members of the council are Jno. Currie, J. Ross and A. D. Bussard.

The annual bonspiel of the Olds Curling Club will be held February 15-16-17, and a large entry of rinks from outside towns is expected. A splendid prize list is being arranged.

AT INNISFAIR: Messrs. W. H. Jackson, James Burton and John Murgatroyd were re-elected councillors by acclamation at the town election.

**"Be It Ever
So Humble"**

IT is to the "humble homes" of Canada that the great majority of Life Insurance payments find their way.

Many such homes today would lack the necessities of life—were it not for the "little savings" which thrifty parents have set aside periodically in Life Insurance.

To the family which loses its breadwinner, Life Insurance means money to buy food and clothing—money to pay the rent—money to pay household bills—money to educate the children. Life Insurance also

means, in many cases, independence of private charity or public relief.

In your own community, as well as in hundreds of cities and towns across Canada, "little savings" in Life Insurance are doing "big jobs". During the past six years, policyholders and beneficiaries in Canada have received, daily, from their Life Insurance Savings, half a million dollars.

"Be it ever so humble"—there's no home which cannot have the much-needed protection of Life Insurance.

Life Insurance

Guardian of Canadian Homes

WORLD HAPPENINGS BRIEFLY TOLD

The United States public debt has reached a new alltime peak of \$34,107,864,000.

Annual meetings of the Canadian Seed Growers' Association will be held at the University of Saskatchewan, Saskatoon, on June 24, 25 and 26.

Edward W. Meyerstein has offered \$500,000 as the foundation of a fund to build a convalescent home in London to serve the capital's large hospitals.

The air ministry announced the king had been pleased to assume the appointment of air commodore-in-chief of squadrons comprising the auxiliary air force.

Ill for a month, William N. Gibson, 66, assistant manager of the Calgary Exhibition and Stampede Ltd., died in hospital at Calgary recently. He was born at Danville, Que., coming to Calgary in 1908.

Canada reported employment of 93.1 per cent. of available workers on Nov. 1, 1936, compared with 90.4 per cent. on Nov. 1, 1935, the quarterly statistical bulletin of the international labor bureau announced at Geneva.

The Duke of Gloucester's promotion to the rank of major-general in the army has been officially announced. King George VI also conferred on the Duchess of Gloucester the title of Dame of the Grand Cross in Order of St. John of Jerusalem.

Lt.-Col. Ronald S. H. Stafford has been commissioned to prepare measures for regulation of the British Broadcasting Corporation in case of war. Lt.-Col. Stafford was appointed some time ago "to revise and bring up to the minute appropriate measures in the event of war."

Fred McCargar, secretary of the Rodeo Association of America, announced that Pete Knight of Crossfield, Alberta, had been ranked champion bronc rider for 1936. John Bowman of Oakdale, Calif., won the cowboy national championship ranking of the association.

Wins Science Prize

Thousand Dollar Award Goes To 32-Year-Old Doctor

The \$1,000 prize of the American Association for the Advancement of Science was awarded to 32-year-old Dr. W. M. Stanley, of the Rockefeller Institute, for discovery of a new principle of disease and possibly the origin of "life".

The principle is that proteins, which have been supposed to be inert, lifeless particles, can spontaneously become at least half alive, and that they can then produce disease the same as bacteria.

He has found the link between inert matter and life, between, his report declares, the lifeless atoms which chemists study and the living cells in which biologists have been seeking the origin of disease and of vitality.

He has demonstrated that certain lifeless protein crystals can become "alive," without any change that microscopes can discover except that they act like bacteria in being able to reproduce their kind, and to transmit hereditary traits to their offspring, much like living "fathers and mothers".

Eclipse Of The Sun

Will Occur On June 8, And Will Be Visible In Peru

Astronomers the world over looked forward to the longest eclipse of the sun in 1,200 years, on June 8, but wondered how they would contrive to study the phenomenon, visible only at sea and on a tiny strip of the Peruvian coast.

The 1937 eclipse will last seven minutes and four seconds, and will not be surpassed until 2150, when an eclipse of seven minutes and 14 seconds will occur—nearly reaching the maximum of seven minutes and thirty seconds.

Blue Ivory Not Artificial

Blue Ivory is not artificially colored, but comes from the tusks of extinct mammoths found embedded in the frozen soil of northern Siberia. The blue color is due to the metallic salts which have penetrated them in the course of centuries.

Would Prove Impossible

Canada Could Not Safely Alter Age For Pensions

According to the Ottawa correspondent of the Financial Post there is a "rising tide of opinion" that old age pensions in Canada should begin earlier than 70. He adds that the fixing of 65 for the beginning of benefits under the social security legislation of the United States "is sure to have repercussions on this side."

But there is one essential difference between the pensions law in Canada and the pensions law in the United States. The United States pensions are being made contributory. Canada's old age pensions, on the other hand, are contributed 100 per cent. by the State—75 per cent. of the Dominion, 25 per cent. by the provinces.

When the old age pensions bill came into force in 1927 few people foresaw the cost. Now that Quebec has come under the scheme the bill will run to \$30,000,000 annually, gradually rising. Any lowering of the age of beginning benefits would run the total up rapidly—might well bring it to \$50,000,000.

The Journal is not minimizing the importance of old age pensions. They are necessary. But it often happens that things necessary are things impossible; nor is it well to forget that our federal treasury is still in the red by about \$100,000,000 annually.—Ottawa Journal.

Miracles Of The Future

List Includes Many Things That Seem Impossible Now

Some of the miracles promised for the future are these, listed by Fact Digest:

Transmitting of electricity by radio.

Men who are fully matured at 10 years of age.

The average person will live to be 100.

Artificial teeth as good as natural ones, roofs that never leak, knives that will not dull and rugs that won't show wear.

Creation of substances that will make chickens as big as pigs.

A two-hour work day.

There will be no visiting. People will stay at home and call on their friends by television.

Dream pills. By taking a certain pill a man will be able to select the kind of dream he wants.

Pneumatic tubes will carry complete meals to homes.

The streets will be sprayed daily with lilac water.

Replacing cotton by an incombustible fabric made from scrap bottle-glass.

Taxicabs will have wings.

Mail chutes will bring letters direct to your home.

George Bernard Shaw says that in 3,000 years, children will be able to talk as soon as they are born.

Photographs have revealed many secrets about the lightning flash. They show that there is a sort of leading dart of electricity, which starts off the main flash. This "leader" flash travels at the rate of about 5,000 miles a second.

Bill—"Isn't it awful that George is going to get married?"

Tom—"What's awful about it?"

Bill—"Why, George was such an easy chap to borrow money from!"

DRESS UP TO YOUR GAYEST OCCASIONS IN THIS CHARMING STYLE!

By Anne Adams

Glamour news... Fashion news! Here's just the adorable dress-up frock you've been looking for to lend a gay touch to every-day occasions, and add allure to "gala events"! So irresistible—its full-skirted charm, that once you've made it, you may expect compliments galore! See how prettily full sleeves may puff above or below your elbow, while uprisings skirtfront and fascinating neckline are accented by dainty bows of narrow ribbon. This captivating model's a delight to behold in lustrous satin, printed or monotone crepe, or silk jersey. And it's as easy to make as it is fair to behold! You'll surely want to repeat this pattern for Spring in, say, a triple sheer.

Pattern 4270 is available in sizes 12, 14, 16, 18, 20, 30, 32, 34, 36, 38 and 40. Sizes 16 takes 3½ yards 39 inch fabric and 2¼ yards ¾ inch ribbon. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

A Crimeless City

Canberra, Capital Of Australia, Claims To Hold Record

In Canberra, capital city of Australia, no one has ever committed a serious crime.

Australians are claiming this as a record for good behavior and surely it would take some matching in other parts of the world. Canberra is nine years old and has a population of 9,000, spread over 22 suburbs. Except for traffic and betting cases and occasionally drunkenness, the police have practically nothing to occupy their time. The authorities attribute the residents' good behavior partly to the fact that Canberra, being a garden city, has no crowded slums.

A New Apparatus

Used To Study Effects Of Poisons In Killing Insects

Development of an apparatus in which the hearts and other organs of insects can be exposed and kept alive and working for many hours was announced before the Entomological Society of America.

Dr. J. F. Yeager, of the United States department of agriculture, described the apparatus and exhibited it at work to members of the society, which is meeting in conjunction with the American Association for the Advancement of Science.

A lowly cockroach was the insect under study in the exhibit and Dr. Yeager projected on a screen the picture of its heart beating rhythmically.

The procedure in accomplishing this, he declared, consists of opening an insect much as a surgeon operates on a human being and exposing the tiny heart. A drop of wax is then placed on it and a human hair inserted in the wax.

The insect is then placed in a normal salt solution and the hair is connected through a lever to a very fine wire and as the heart beats it pulls the hair. A beam of light is passed across the wire and focussed on a screen or recording drum and the vibrations of the wire show directly the beating of the heart.

The apparatus is being used in the bureau of entomology and plant quarantine of the department of agriculture to study directly the effects of poisons in killing insects.

Dr. Marshall Hertig of the Harvard University Medical School demonstrated to the entomologists another new tool of research—the world's smallest pair of scissors. The cutting edges are only about one thirty-second of an inch long and the scissors are used only under a microscope.

With them Dr. Hertig declared it is possible, if the person has the patience, to cut open a mosquito larva.

Great Lakes Fleet Sold

Big Deal Is Reported In Great Lakes Shipping Circles

Purchase of the Great Lakes fleet of Eastern Steamships, Limited, by Upper Lakes and St. Lawrence Transportation Co., Ltd., at a reported price of \$1,300,000, was announced in Toronto recently.

Negotiations have extended over several months. Last spring, 10 boats of the Eastern fleet were taken over and in the deal just completed the balance of the 20-boat fleet were purchased. Eastern operated freighters on the lakes for the past 13 years. The latest deal involved \$700,000, it was understood.

Space Not Available

Turkeys amounting to approximately a million pounds were sent to the British market last year, and more would have gone if refrigerated space could have been found. British tradesmen wanted the turkeys and Canadian producers were eager to sell, but the space was not available. Shipping business must be picking up!—Farmer's Advocate.

The first postoffice in the United States was established in Boston in 1639. Philadelphia had a postoffice in 1683.

Mining Development In The West

Rapid Expansion Of Mining Activity In Northwest Territories

The rapid expansion of mining activity which has taken place in the Northwest Territories in the past half decade is indicated in a review of the progress of prospecting and development prepared at the direction of Hon. T. A. Cramer, Minister of Mines and Resources. The statement, which is based on reports from the Great Bear Lake and Great Slave Lake fields, covers activities up until the end of November, since when the freeze-up has caused a general curtailment in surface operations.

Prior to 1929 the only metal mining properties with underground developments were at Great Slave lake, namely, the lead-zinc property near Pine Point, and the Aurous Gold property on Wilson island. Numerous small parties had been engaged in prospecting various areas in the North for a number of years but they were not successful in finding important mineral occurrences. The large scale aerial field exploration carried on by several mining companies in the Northwest Territories was responsible for the opening up of new areas. In 1929 the copper sulphides at Hunter Bay, and in the Coppermine River sections were staked. The following year the Echo Bay area of Great Bear lake became the scene of pitchblende and native silver discoveries, and the resultant activities spread over a wide area during the next three years.

A renewed interest was shown in the Great Slave Lake section in 1935 when gold discoveries were made on Outpost island and at Yellowknife bay. These finds drew the attention of prospectors at Great Bear lake with the result that by the summer of 1936 most of them had been attracted to the Great Slave Lake field.

What appears to be one of the most important discoveries in the Northwest Territories in recent years is that at Gordon lake, 50 miles northeast of Yellowknife bay, Great Slave lake. Another gold discovery was made on the south shore of Great Slave lake about 20 miles east of the Taltson river. These finds were the result of prospecting efforts carried on in 1936 in favourable areas south and north of the eastern part of Great Slave lake. There have been about 600 claims staked in vicinity of Gordon lake and several promising veins have been found.

The gold occurs in quartz associated with galena, sphalerite, chalcopyrite, pyrite, and stibnite. One vein averages about eight feet wide and has been traced for 700 feet with visible gold showing in several places.

Proves Too Costly

Modern Method Of Producing Gold Does Not Pay

Lord Rutherford, in the Henry Sidgwick Memorial lecture at Cambridge, spoke on "Modern Alchemy" and said it was now possible by modern methods to produce exceedingly minute quantities of gold, but only by the transmutation of an even more costly element—platinum. The amount of transformation is usually on a minute scale and only rarely is the matter produced either visible or weighable. In the case of gold, the gold is not visible. —London Times.

JUNIOR FARMERS VISIT INTERNATIONAL HARVESTER PLANT

When prize-winning boys and girls, 75 in number, and members of the Provincial Junior Farm Club team, visited Hamilton, Ont., a short time ago, one of the most interesting interludes was a trip to the Hamilton works of the International Harvester Company and the picture shown above was taken after a trip through the large plant. F. M. Morton, vice-president, who is also honorary president of the Canadian Council on Girls' and Boys' Work received the group and conducted them on a trip through the farm implement factory and binder mill. Mr. Morton is seen in the centre of the second row. At noon there was a tasty luncheon served, at which J. G. Rayner, president of the Canadian Council, extended a generous word of praise to the Harvester company for its courtesy and contribution to the pleasant associations to be carried away by each visitor as a life-time memory of the trip. Among other tributes, Mr. Rayner explained that a part of the funds necessary to carry on club work accrued from the proceeds of a gift made years ago by the International Harvester Company.

If You're Told to "Alkalize"

Try This Remarkable "Phillips" Way
Thousands are Adopting

On every side today people are being urged to alkalize their stomach. And thus cause symptoms of "acid indigestion," nausea and stomach upsets.

To gain quick alkalization, just do this: Take two teaspoons of PHILLIPS' MILK OF MAGNESIA 30 minutes after eating. OR — take two Phillips' Milk of Magnesia Tablets, which have the same antacid effect.

Relief comes almost at once — usually in a few minutes. Nausea, "gas" — fullness after eating and "acid indigestion" pains leave. You feel like a new person.

Try this way. You'll be surprised at results. Get either the liquid "Phillips" or the remarkable, new Phillips' Milk of Magnesia Tablets. Delightful to take and easy to carry with you. Only 25¢ a box at all drug stores.

ALSO IN TABLET FORM:

Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

MADE IN CANADA

PHILLIPS' MILK OF MAGNESIA

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER XIII.—Continued

Then Lance was detaching himself from Stephanie's court of listeners to her honeymoon plans and at Starr's side again. She was not rid of his dark personality that night for an instant. The whole room danced with a collection of Lances, cut out like stiff paper dolls, all in a row. He injected into her thoughts, as though he guessed something of her longings, sensed what she might have been mulling over of the injustice of things while Stephanie had talked. He drawled, smiling:

"Stephanie's so obvious. More like a nouveau riche than the last hope of a fine old name. Her and her yachts! If you want a yacht, Starr, you can have it. Mine is in the Sound now, in commission. I'd thought of making the Florida trip myself, and it's been convenient for a little ferrying this Summer. . . . You can have mine, and it's twice as big as the Dale's tub. I'll take you to Hawaii, too, if you want to go—anywhere! There isn't anything Stephanie Dale has that I can't give you."

The thought was a knell in Starr's heart: Except love—except love!

Sapphira was turning back the bed covers when Starr at last got away from the nightmare of the party downstairs and fled to her room. Sapphira had insisted that Starr could not do without her, and the girl had yielded to the colored woman's persuasions that she be allowed to come up to the Westchester place on the train. Sapphira did not want to lose such an opportunity for displaying the georgousness of her silver bangles, her belted white, voluminous robe and her purple head handkerchief. Nor her "foreign accent." Sapphira's display of Kabyle may have sounded to the initiate more like hog-Latin, but she managed to make it do, and the effect was inspiring.

At the present moment she was more concerned with Starr as she laid out the girl's white silk night-robe—as a woman with Egyptian princess ancestry it would never have done for her to wear pajamas—and the tiny white marabou-trimmed mules. Starr was shivering as she came into the room. Sapphira surveyed the slim silver flash that was Starr.

"Miss Starr, for lawsy sakes, how sick you look, honey! Wasn't I tellin' you you oughtna come here on this here party? You-all oughta be home in your own baid!"

In the pale lights of the boudoir, Starr had lost all of her color. Her brittle bravado had gone with it, too. She looked as frail as a white, swaying flower.

The plump, motherly old colored woman was saying anxiously:

"You ought to be home an' havin' a doctah seein' after you, Miss Starr—you shore ought. Whyn't you-all let me send for a doctor?"

Starr smiled wanly, but did not answer. Oh, no! She had seen a doctor once—not so long ago. "You won't live six months," he had told her brutally, so very secure in his own perfect health in that room with the blue velvet curtains where fool birds sang of life outside the window. Six months. . . . And how much of that six months had slipped by already? She dared not let herself think! Why face the agony of seeing another doctor, of hearing him reiterate that same terrible sentence of death?

Dear old Sapphira! She cared. But then, of course she could have no idea of the fate that hung over the girl she had come to love in the way of such hot-blooded colored women from her part of the South—the girl who, to Sapphira, was merely being an actor, like herself, in a most intriguing little drama of make-believe.

How could Sapphira know? Starr knew. It was Fate. Doctors had not been able to do anything for her father. He had faded visibly day by day of an unnamable malady which had defied medical science. Science—which could not combat the curse of Tut-Amen-Ra. She was going the same way.

Starr could see it herself, as she faced her mirror, stripped of her artificial vivacity and when the cold cream had wiped off every vestige of the glamour that was a girl painted on glass. It was in the depths of her long, mysterious eyes—eyes too like those of Ama-Sun when she had looked on Tut-Amen-Ra in the long ago and they had found each other good. It was in the pallor of her skin, the way her shoulders drooped when she was off her guard. It was in her weary limbs, in her mind. Rooted deep, unshakable, the curse of Tut-Amen-Ra!

The colored serving woman was hurt when the only reply Starr made to her was:

"I shan't need you any more to-night Sapphira."

The woman was not to be so easily put off. "But can't I even help you-all undress, Miss Starr?" she persisted. "You're so daid tired, honey."

"I said I don't need you," Starr repeated tonelessly.

Sapphira started to say something; stopped. She knew these moods of Starr's. She said, in a voice of resignation:

"All right, Chile. I reckon you-all'll have it your own way, anyhow. . . . I've put out your sleepin' powder on the table over yonder by the lamp."

Starr nodded as Sapphira reluctantly withdrew, her eyes on her mistress until the last minute of the door's soft closing.

Her sleeping powders. Starr smiled slowly, understanding. It had come to that—at last. She had had to re-

HER HANDS WERE ALL OUT OF SHAPE

In Grip of Rheumatism for 15 Years

Here is a letter which shows the value of persevering with Kruschen:

"For about two years I hardly went out. It was such a painful effort to walk owing to rheumatism. My hands and feet were the worst affected. I was unable to walk without a cane. I read so much about Kruschen. I decided to try it. I was three months before I felt any better, but I kept on and since then I have been fine and never used the cane. My hands were all out of shape, but they are almost normal now. Of course I could not expect to get better all at once, as I had suffered for 15 years before I started on Kruschen."—(Miss) A.L.

Rheumatism is frequently caused by an excess of uric acid in the blood. If you could see how Kruschen dissolves these uric acid deposits, then dissolves them away altogether, you would agree that the Kruschen treatment should bring relief in cases of rheumatism.

sort to sleeping powders in an attempt to rid herself of some of the terror of the dark, lonely hours when there were no parties to distract her attention from that miserable dirge that pounded incessantly like the drums of doom through her tortured mind: "Thou Shalt Not—Thou Shalt Not—"

CHAPTER XIV.

Tired as she was, sleep was the farthest thing from Starr's thoughts. The sleeping powder—Well, after awhile. For the minute thoughts would come, and with them a restlessness that made her forget the weariness of limbs.

Her bedroom opened onto the upper gallery of the high verandah of the house which had a touch of the Southern spirit in its architecture. All the bedrooms along the front of the house, apparently, lay along this gallery, facing it.

She swung her windows wide and wandered out into the coolness of the September night, onto the darkness of the upper terrace.

Sweet stillness lingered like a benediction over the spacious, lovely grounds of Stephanie's home. The guests were all in their rooms, the lower floors darkened, the radio stilled. A light flickered here and there. It was an atmosphere of ineffable peace. Peace. . . . The one thing on earth Starr Ellison craved. But how could there ever be peace for her when her soul was tortured.

Standing beside the verandah rail, her eyes sought the sky. The stars were very brilliant against their black velvet background, reminding her, except for the nip in the air that showed a more temperate clime, of the nights that had hung over Algiers.

Suddenly she was overwhelmed by her memories. Not memories of Egypt and the hot and burning sands, the Lethe of its nights, but of things nearer to her, a thousand times more poignant. Thoughts of a night or two ago—The Casino—Michael. Just before all the terrible things had happened, they had looked at just such a sky as this together—a sky that had held a world of romance. There had been the night before—another sky, the Mayfair—a terrace—she and Michael together had looked at the black velvet sky, at the twinkling lights of a fairy city. . . . His arms had been seeking to enfold her. She could hear his voice, like some great throbbing wonder voice heard from an ineffable distance:

"To me you are just like your name. A warm, near star. A dear star!"

A Body Builder

WHEN you feel out-of-sorts, when you've no appetite, or stomach gives trouble, with gas or dyspepsia, try Dr. Pierce's Golden Medical Discovery.

If you want to put on healthy flesh—this is the tonic for you. Read what Mr. B. Gliddon of Clinton, Ont., has to say: "In the spring of 1914 after playing hockey and having worked long hours all winter, I became run-down and was losing weight and energy very rapidly. I couldn't sleep at night. In March I started using Dr. Pierce's Golden Medical Discovery. I gained in weight, my appetite was wonderful and I felt as well as ever. Buy now!"

New size tablets 50 cents, liquid \$1 & \$1.35.

A long tremor passed over her body as her hands clutched at the trailing vines, crushing them. That was all finished. Everything connected with Michael was finished. She was here, a guest, under the roof of the girl Michael was going to marry. The girl he loved. The girl he had loved all the time. Hadn't he told her so from that first minute of their meeting?

There would be no more soft, tender words for her from her Michael-Hassan. From now on all she would know would be the sugared flattery of a man who had a "line" for every girl he met—a "hot line, but not too hard-boiled."

She turned from her contemplation of the black sky and slipped back through the long open windows into her room; sought her dressing table mechanically, as mechanically as another woman might pick up a broom to sweep away the cobwebs.

She loosened her hair, let its black cloud sweep about her shoulders. Nervous fingers combed and brushed the long, black mist. Suddenly her arms were flung out to the unhearing night.

"I can't!" she cried wildly. The sound of her own voice, breaking through the uncanny stillness, frightened her. "I can't! I can't go through with it!" Death that she had been contemplating for so long, with what equanimity she could, seemed terrible enough. The new step that she had been deliberately contemplating was ineffably worse.

As she wheeled around, her arms flung high in a challenge to an inexorable Fate that she could not combat, she caught sight of the glass of water and the powder which Sapphira had placed ready for her and for the moment she should leave her wild parties and want to seek much-needed repose. Her arms dropped. Dead. An idea, half-aborning, was coming full-fledged into her being. A desperate idea was coming to life in her agonized brain.

Swiftly she darted across the room to the table and the powders, her black hair flying. One of those powders meant a night's sleep. Two or three, perhaps four, would mean—peace. The peace that seemed nowhere on this earth.

Dared she? In that moment Starr Ellison felt that the small matter of taking her own futile life required tremendously less courage than carrying on. Carrying on—for what? . . . Why cling any longer to a life which held nothing but heart-break?

The powders. . . . Ambassadors from the rulers of Lethe themselves. They were ready—waiting—holding out siren arms of promise to her. They promised her all that had hitherto been denied. Peace! Here was one way, the only way that had been shown to Starr Ellison at all, battling her futile way against the inevitable, of cheating the curse of Tut-Amen-Ra!

(To Be Continued)

Peace In Northern Europe

People Of Scandinavian Countries Live In Spirit Of Unity

In contrast to the seething strife, suspicion and unrest in most of Europe to-day, the world was reminded recently of the tranquility and friendliness which prevail among Europe's northernmost nations.

The occasion was the first "Day of the North" observed by the five northern states of Denmark, Iceland, Sweden, Norway and Finland to prove that they live in a spirit of unity and peace. Children opened the observance by singing the national anthems of the five nations. These were broadcast from country to country to the accompaniment of church bells in the five capitals.

Throughout the day, in churches, schools and theatres, many addresses were delivered. These were all reproduced and added to in the newspapers. The day's message in every instance was the same—unity and peace.

Climaxing this great day of the free democracies of Northern Europe was an exchange of greetings and congratulations, by radio, by the rulers of the Scandinavian kingdoms and the president of Finland. Not only did they pledge unity and closer ties in the realms of culture and economics, but they declared their governments were determined to concentrate on the work of peace rather than the pursuing of the arts of war. —The Pathfinder. 2185

Here's more help to PREVENT MANY COLDS

At The First Sneeze, sniffle, or any irritation in your nose

Quick! A Few Drops of Vicks Vapo-Rol up each nostril

It's scientific medication swiftly spreads through nose and upper throat—where 3 out of 4 colds start.

You can feel the tingle as Vapo-Rol s-p-r-e-a-d-s through the trouble zone in your nose and upper throat. Vapo-Rol is specially designed to stimulate Nature's defenses in this area. Used in time, Vapo-Rol helps to prevent many a miserable cold from developing . . . and to throw off head colds in the early stages.

Quickly relieves "Stuffy Head"

VICKS VAPOROL

Little Helps For This Week

Walk worthy of the vocation wherewith ye are called, with all lowliness and meekness, with long-suffering, forbearing one another in love. Ephesians 4:1-2.

Help us O Lord with patient love to bear
Each other's faults, to suffer with true meekness;
Help us each other's joys and griefs to share,
But let us turn to Thee alone in weakness.

You should make it a special point of asking God every morning to give you, before all else, the true spirit of meekness He would have all of His children possess. You must also make a firm resolution to practise this virtue in your intercourse with those persons to whom you owe it. No more than this is needed to make you more gentle every day, and you will be happy if you can do this. But if you should fail do not be disheartened but go on again day by day as if you had not failed.

Few Will Try It

Scientist Says Invisible Rays Will Awaken A Wasp

If you want to wake up wasps, a Smithsonian Institution scientist said, use the invisible rays of ultra-violet light.

Although he admitted most people would prefer to let sleeping wasps sleep, Austin H. Clark said he ran into the problem of rousing them out of their 18-hour slumbers while studying the insects' personalities.

Wasps, he said, are just as ornery as human beings. Watching newborn wasps, he found some irritable and bad-tempered—but others gentle and friendly.

The lone male studied in the experiment, he said, was just plain lazy.

The trade routes of Asia Minor which connected the east with the west about 2000 B.C., were the first highways known.

ITCHING

TORTURE STOPPED In A Minute!

For quick relief from the itching of pimples, blotches, eczema, athlete's foot, rashes and other skin eruptions, apply Dr. Dennis' cooling, antipruritic, liquid D. D. D. PRESCRIPTION. Its gentle oils soothe the irritated skin. Clear, greaseless and stalolous—dries fast. Stops the most intense itching instantly. A 3½ oz. trial bottle, at drug stores, proves it—or money back. Ask for D. D. D. Prescription.

Oh Boy! What's this? Why, another of the Pioneer S.C. Group's "Sidesplitting Social Evenings!" When? Tuesday, February 16th at 8 p.m. Where? In the Leuzler Hall. Come and enjoy yourselves, everybody.

The Y.P.M. Circle of the Evangelical Church entertained their mothers at a Valentine party last Thursday at the home of Mrs. J. V. Berscht. After a short program each mother was presented with a valentine. A dainty Valentine lunch brought the evening to a close.

On Wednesday, March the 10th Knox United Dramatic Society will present the melodramatic story of "Lighthouse Nan," a three act play of the sea coast with plenty of laughs. Watch for further particulars and be sure to reserve the above date for this play at the Opera House.

In spite of inclement weather Wednesday evening, twenty-eight young people met at the home of Mr. and Mrs. James Hoggood in honor of their daughter Connie, who is leaving shortly for Toronto. A gala evening was spent playing cards, games, and in singing. Afterwards a dainty lunch was served by the hostess. The departing guests wished Connie success in her year's training at the Toronto General Hospital, where she is completing her bachelor of science course.

In the raffle sponsored by the Curling Club and drawn last night, Norman McLeod was winner of the curling rocks, with Ticket 254, and Harry Gabel won the quilt with Ticket 272.

WEEKLY JOKE

Object of the joke was to find out if you had planned to buy her a ring and all that?"
"Yes."
"Too bad! No doubt you had planned to buy her a ring and all that?"
"Yes."
"Had your money all saved up, eh?"
"I should say so. Had fifty dollars all ready."
"I say, old man, you—er—you couldn't lend me that fifty dollars till you find some other girl who'll have you, could you?"
